GIT, JIRA, Figma, Zepplin

🎓 Education

B.Tech in Computer Science and Engineering,
KIIT University ⤢
2013 – 2017 | India

💼 Professional Experience

Knowledge Lens, *Full Stack Developer* ⤢
Feb 2019 – present | Pune, India

- Worked as a contractor for **ZS Associates** ⤢ where i was involved in multiple projects for both US and UK based pharmaceutical giants.
- Applied my skills as a Front end engineer (**React.js** and **Angular**) and was responsible for building scalable and responsive web apps which have hundreds of daily users.
- Guided a team of 3 developers in the last project which involved developing a dashboard to show data trends using different types of charts which was later used by the client for internal statistics and better decision making.
- Worked with - HTML, CSS, javascript, React.js, Angular 2+, Highcharts, D3.js, Charts.js, Material UI, OKTA, JIRA.

Smartbeings Inc., *Full Stack Developer* ⤢
Feb 2018 – Jan 2019 | Bengaluru, India

- Worked as a **MEAN stack** developer. Was involved in the product 'Woohoo' and the Smartbeings AI platform.
- Responsible for development and scaling the backend which included making REST API's, writing socket connection code and also maintaining the database.
- Was also involved in the development of the Woohoo Web Client and the Smartbeings AI web platform.
- Integrated a number of third party services like **Spotify**, **Twilio**, **Uber** and **NPR News** to the platform.
- Integrated **Google's Dialogflow** to develop a conversational experience between the device and the user.
- Worked with - Angular 2+, Node.js, Express.js, MongoDB, Redis, PostgreSQL, Socket.io, AWS and Nginx.

🎸 Interests

Open Source
Interested in the open source world and actively try to contribute in various libraries and tools.
Have contributed in www.covid19india.org and another early stage CSS-in-JS library (https://github.com/siddharthkp/react-ui).

Design Systems
Recently discovered the world of Design Systems. Have been interested in the latest trends that involve creating a better and easily maintainable design system using React.js, CSS-in-JS, theme-ui and system-ui.

🗂 Projects

Nirvana Ipsum, *www.nirvana-ipsum.com* ⤢
A web app that spits out **Nirvana** lyrics that you can use as placeholder text made using **React.js**.

Quick Spotify, *https://shubh0107.github.io/quick-spotify* ⤢
An app that lists the users top **Spotify** tracks for last month, last 6 months and all time and also gives a small preview for each song when hovered over it's album cover.

(PS: It is a WIP. I'll be adding more features soon like animations and the ability to discover new songs according to the user's preferences.)
